Abstract

The following is a selection of solutions for various problems and exercises found in Sample Book Title by Problem Author. These solutions were written by Solution Author and updated last on 04-06-2019

Contents

1 Chapter 1

1.1 Problem 1

This is a sample solution for problem 1.1. The below is some latex that will be used in the solution

$$\int_a^b f(x)dx = F(b) - F(a)$$

In the above its clear that the define integral $ f $.

1.2 Problem 2

This is a sample solution for problem 1.2. The below is some latex that will be used in the solution

$$a = b = c = d$$

In the above its clear that $ inline $. The end.

2 Chapter 2

2.1 Problem 1

This is a sample solution for problem 2.1. The below is some latex that will be used in the solution

$$\int_a^b f(x)dx = F(b) - F(a)$$

In the above its clear that the define integral $ f $.

2.2 Problem 2

This is a sample solution for problem 2.2. The below is some latex that will be used in the solution

$$a = b = c = d$$

In the above its clear that $ inline $. The end.
